### Gangtey / Gogona Trek

This trek is to the beautiful Phobjikha valley (3,000m), one of the few glacial valleys in Bhutan, which lies in the mountains east of Wangduephodrang. After crossing over the pass you soon come to the great monastery of Gangtey, established in the 17th century. The village of Phobjikha lies a few kilometers down from the monastery, on the valley floor. This quiet, remote valley is the chosen winter home of the rare black necked cranes, who migrate here annually from the Tibetan plateau. This moderate trek visits the villages of Gogona and Khotokha, passing through meadows and fields, then forests of juniper, magnolia and rhododendrons in full bloom in April. It is one of the finest low level treks in Bhutan. Season : The best times for this trek are March to May, and September to November. The best months are April and early May when the rhododendrons are in full bloom.
